

HEALTH WELLNESS COMFORT

Transforming the Future of Healthcare
with Trusted, Unprecedented,
Proactive, and Preventive Monitoring.

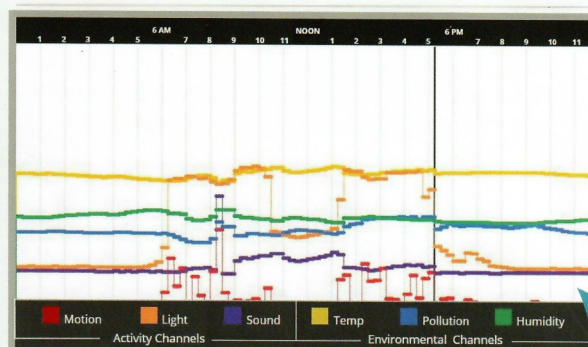

DIGITAL CARE THROUGH OBSERVATION

Through the Dove Care Watches;

Through Dove Care's Wellness Watch, Health Watch, Comfort Watch and Preventive Watch, authorized family members will be alerted on environmental changes and potential health setbacks. Our Wellness Watches are the premiere observation platform for senior care.

Live Chart

Bio-Monitor ID : 132064

All authorized family members and caregivers have free access to the daily real-time Life Pattern Charts.

PRIVACY. DIGNITY. SECURITY.

Dove Care observation technology is your only trustworthy companion in the home of your loved ones. There are no wearables and our accurate biometric observation sensors record high accuracy health data inputs 21,000 times every 15 minutes without compromising personal information.

treat, cure, or prevent any disease or condition.

HIGH RESOLUTION SCANNING & OBSERVATION

Our Dove Care sensors are always on duty. All authorized family members and caregivers can have access to the daily, weekly and monthly charts and graphs that provide detailed information regarding the overall health condition of your loved one. The Dove Care system acts as a single source of truth of your loved one's overall wellness, health and comfort.

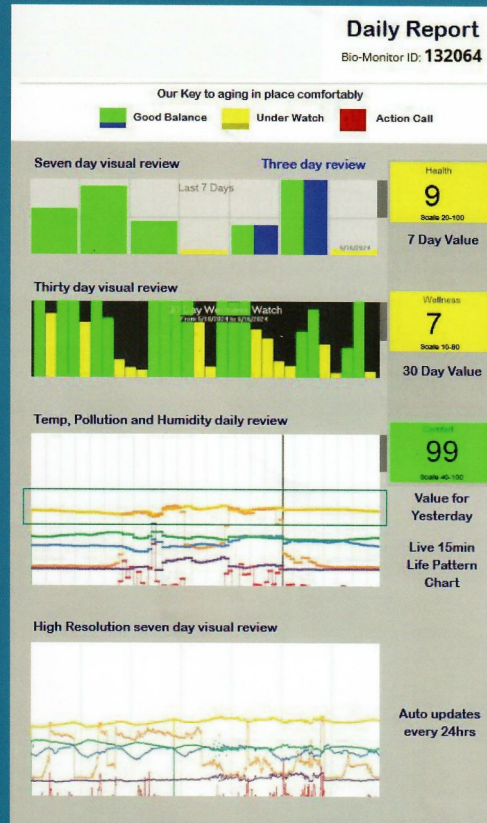

Dove Care patented technology reads the body language of a person in their natural living environment and interprets variations in your loved one's daily life patterns.

Dove Care uses trends in the daily life of a person and recognizes when there is a deviation in the life pattern of a person, which determines changes in habits related to wellness, health, and comfort. The sensors create Red, Yellow and Green measurements that gauge those daily patterns. The system then sends alerts before a health issue becomes critical.
